### Update on: Angel Selelo

Menighedsrådet Tibirke Kirke,

Angel and her SOS family

I am pleased to be writing to you again this year about Angel. I join her to wish you a prosperous 2017. I hope you enjoy the stories I have about her this year.

Angel is described to be a sweet girl who interacts well with other children by his SOS Mother. She is respectful and cares for her SOS family and friends. She is showing more responsibility, as she follows instructions when assigned tasks to complete in the house. She will sing along to her favourite song, 'he lifted me up' as she does the chores well. You can tell that her SOS Mother is so proud of her when you hear her talk about Angel. She has got a god eye for dressing well and being neat, one could say she is way too presentable for her age.

### JUNIOR SCHOOL.

Angel is doing her second year at junior school. The program has changed to another level and she is having some difficulties in her studies. This does not stop Angel from taking her studies serious; it pushes her to even put more effort in her studies by the extra lessons that are offered in the village after school and also studying during the weekends to boost her grades. She attends classes so well and her attendance is good. Her SOS Mother is so happy about her positive attitude towards school and she always tells Angel's siblings to be like her. I encourage all my children to work hard on their studies because a "wise man once said the only way out of poverty is acquiring a higher education because through it all is possible!" says the mother. 'I would like to become a nurse!' says Angel.

Angel

I would like to thank you most sincerely for the support you
